The Duro-Last Dozen:
12 Advantages of Being an Authorized Contractor

1. **Proven Track Record** - Since 1978, more than a billion and a half square feet of Duro-Last membrane have been installed all over North America. Duro-Last has earned a nationwide reputation for our high-quality, leak-proof single-ply roofing system.
2. **Every Duro-Last Roof is Prefabricated to Deliver Quality** - Prefabrication eliminates up to 85% of rooftop seaming, requiring less on-site installation labor than other systems. Completing the work in a controlled factory environment improves the long-term performance of the Duro-Last roofing system.
3. **A Complete Roofing System** - Custom-fabricated parapets, and stack and curb flashings eliminate the majority of labor from the most critical roof areas - transitions and changes of plane. Our EXCEPTIONAL® Metals division produces a wide variety of metal components that complement a Duro-Last installation.
4. **Higher Profits** - With Duro-Last, there is less material to inventory, less labor needed for installation, less material waste, fewer callbacks, AND you can work all-year long. The Duro-Last roofing system can be installed in any climate or season, and in most weather conditions.
5. **Ideal for New Construction, Re-roofs, and Retrofits** - The Duro-Last roofing system is effective for any flat or low-sloped commercial, industrial, or institutional application.
6. **The "World's Coolest Roof"®** - The Duro-Last white membrane is the best choice for your "green" roofing project. Its exceptional reflectivity can reduce energy costs throughout North America. The Duro-Last system is also the ideal for installation under a rooftop garden or photovoltaic application.
7. **Best Warranties in the Roofing Industry** - Our standard, comprehensive 15-year No Dollar Limit (NDL) commercial warranty is transferable, has no exclusions for ponding water, and provides coverage against consequential damages that result from defects in the Duro-Last material and/or installation workmanship. Duro-Last also has 20-year warranties available.
8. **Safe and Clean Installation** - The mechanically-attached Duro-Last system is installed without loud machinery, hazardous materials, noxious fumes, hot tar, or mess. A new Duro-Last roof often can be installed over an existing roof without an expensive tear-off, virtually eliminating dust or falling debris that might interfere with building activities or damage sensitive equipment.
9. **Code Approvals** - Duro-Last has met or exceeded all major fire and wind code requirements, and obtained necessary regional approvals throughout the United States and Canada. The Duro-Last membrane is resistant to fire, chemicals, grease, high winds and punctures, and easily accommodates wide temperature extremes.
10. **Nationwide Support** - Duro-Last's sales, marketing, and quality assurance team can assist with any need you may have. Duro-Last prides itself on providing the world's best customer service.
11. **Design Assistance** - Extensive technical support is readily available at no cost from Duro-Last's Engineering Services Department, including CAD drawings and material estimating.
12. **AMP-Up Incentive Program** - Take advantage of local advertising and promotional opportunities with help from Duro-Last, through our AMP-Up program. Once you reach a pre-determined sales target, Duro-Last will credit your account for money you spend on marketing activities that you decide are right for your business.
